## Our Background

**Pioneered** the use of polyurethane resins for sealing cracks in concrete and helped build that market.

The first to package polyurethane grouts in an easy-to-use Quick-Mix cartridge system over **30 years ago.**

## The Prime Resins Difference

Prime Resins is a leading manufacturer of chemical grouts, foams, adhesives and coatings for infrastructure repair & protection. We provide solutions for problems in leak sealing, soil stabilization, slab lifting, structural repair and coatings/secondary containment.

### What sets us apart?

**Technical expertise:** We were the first in our field to offer 24/7 technical support.

**Turnaround time:** We have the fastest turnaround in the industry. Many shipments go out same business day as the order.

**Training:** We provide on-site training, application assistance, project consultations, and training seminars at our Head Quarters.

**Great value:** We offer the best combination of product performance, expertise, and experience.

**Solutions focus:** We work as partners with our clients to determine causes and to find remedies for your challenges. We are available before and after a purchase to answer questions and support our clients. This approach is in the DNA of the company.

# Leak Seal

Prime Resins offers chemical grouts for sealing leaks in a variety of structures. Our combination of superior product performance and top notch technical support are unmatched in the industry.

## All leaks are not the same...

There are many types of leaks, and we offer different solutions to address each of them. We have a full range of products to seal leaks of all types and sizes. These products range from cutting-edge acrylate resins to hydrophilic and hydrophobic polyurethane grouts. Let us maximize your efficiency: one of our technical consultants can advise you on the best product and approach for your particular application.

## Project Considerations

There are several factors to consider when choosing how to seal a leak, including:

- Volume of leak, weeping or gushing
- Size of crack or defect
- Accessibility of the site
- Environmental conditions
- Expansion rate, set time, and viscosity of the grout
- Physical properties of reacted grout

## Applications

- Treatment Plants
- Manholes
- Culverts
- Leaking Dams
- Underground Walls
- Parking Garages

Several Prime Resins products have been independently tested and verified to meet **NSF/ANSI Standard 61** for contact with drinking water, making them ideal for water treatment, transport, and storage structures. The eco-friendly designation also makes these a great choice for work on seawalls and near wetlands or other environmentally sensitive areas.
